

New 3D printing materials Giveaway

Basis

1. The giveaway starts on 15th February at 9:30 am (CET) and ends on 28th February 2021 at 10 pm (CET).
2. All participants must be +18 (or have a legal representative).
3. To enter the giveaway you must submit an idea of a project in which at least one of our new materials (Tough PLA and BVOH) would be the ideal filament to create it. You should have in mind their main properties, since you would win one spool of the material required to develop this idea.
4. People from all around the world can participate with no maximum of project ideas.
5. There are two categories: most creative idea and best design. The most creative idea category is for any kind of project, independently of its difficulty and techniques; while the best design category puts its focus on those highly demanding projects that require filaments with more demanding applications. For both categories a spool of Tough PLA and BVOH will be gifted away.
6. There will be four winners in total, one for each category and type of filament. Only in case there aren't enough participants the same person will be able to get more than one spool of filament.
7. All projects must be sent to marketing@bcn3d.com with "New filaments giveaway + YOUR NAME" in the subject. The email must include name, location, extract of the idea (or ideas), sketches (if created any) and an explanation of why Tough PLA/BVOH is the ideal material for this project.
8. Winners will be announced on 8th March 12 pm (CET) and we'll personally get in touch with them.
9. Winners must print at least one prototype of the project using the provided spool. They must upload a couple of photos of the result along with a review of the material in their social media within a year. Tags and hashtags linking the materials to BCN3D and its filaments are required.
